Questions and Answers

October 28, 2010

Target Population

How many participants are we required to register? Can they be all unemployed/underemployed or all incumbent workers, or should it be mixed and if so are there any directives about the mix?

Register as many participants as you can serve with the award amount. Grantees will be awarded a maximum of \$500,000. How many participants you serve will also depend on your project design. Participants can all be unemployed, underemployed, incumbent workers or a combination of the three.

Proposal Criteria

There are six or more areas of training curriculum listed. How many of these courses must be taught? We are beginning to offer hybrid/electronic courses and advanced hybrid mostly for experienced (incumbent) workers. Would that qualify?

The training curricula listed in the SFP Overview are examples, how many (if any) you offer to your participants will depend on your project design and your target employers. Hybrid/electric courses and advanced hybrid courses would qualify under the guidelines of this SFP. The Energy Commission will review and approve all curriculum proposed in your application.
